

FERRUZ
INDUSTRIAL GROUP

OLEOHIDRAULICA FERRUZ, S.A.

C/Cobalto 31, Pol. Ind. PTR

50720. La Cartuja. Zaragoza. España.

At OLEOHIDRAULICA FERRUZ, S.A. We certify compliance with the European Commission regulation 1997/2006 (REACH) regarding the Registration, Evaluation and Authorization of Chemical products, REACH, in the articles we supply.

Although said Regulation aims to regulate, mainly, the activity of producers and importers of chemical substances, it also contemplates a series of provisions concerning distributors of said substances and industrial and professional users, also known as "intermediate users".

OLEOHIDRAULICA FERRUZ, S.A. It is considered, according to the regulation, as a "downstream user", and as such is not obliged to register-pre-register the substances it uses in its manufacturing process, but to ensure that its suppliers comply with the obligations of the Reach.

OLEOHIDRAULICA FERRUZ, S.A is a company dedicated to the design and manufacture of cylinders, and hydraulic components, running axles and suspensions for agricultural and industrial machinery, as well as aluminum chassis and semi-trailers and side loading urban solid waste collection trucks.

OLEOHIDRAULICA FERRUZ, S.A does not manufacture substances and / or preparations nor import them outside the EU. OLEOHIDRAULICA FERRUZ, S.A acts as an intermediate user ("downstream user") using different chemical products to manufacture our products (for example, for tasks such as surface treatments, cleaning, painting, greasing, etc. of the components). The corresponding Safety Data Sheets for these products are stored on our Intranet and are available for consultation. Therefore, the registration obligation does not apply to our products.

The only requirements that OLEOHIDRAULICA FERRUZ, S.A. must meet. are:

1. In the event of an intentional release of substances contained in articles, these substances must be registered (if produced or imported in quantities greater than 1.0 tonnes / year);
2. In the event that SEP appears at a level greater than 0.1%, the presence of such substances must be notified to the "ECHA" Agency and the customer.

The registration of substances manufactured and imported (outside the EU) as such or in preparations is the sole responsibility of the manufacturers and importers and not of the users (such as OLEOHIDRAULICA FERRUZ, S.A). Regarding the substances contained in our articles, we can confirm that none of the substances present in the SEP's "candidate list" (substances of very high concern) are present in our articles in amounts greater than 0.1%.

Without a doubt, we will regularly follow the evolution of the substances that are incorporated in the future in the Candidate List of Substances of Concern, in order to update the information and make the pertinent communications to our clients.

Zaragoza, November 2020
